Rachele Bizzarri

front-end developer

React/Vue/TypeScript developer focused on performant, accessible interfaces
with a Digital Humanities lens on UX and content.

// RELEVANT EXPERIENCES

HexErgy // front-end developer

JANUARY 2026 - PRESENT | Firenze, Italy

Contribute to the evolution of the company's platform, taking ownership of the maintenance and ongoing improvement of customer-facing interfaces. Renewed code-writing methodologies and refactored UI components to improve platform performance and maintainability. Leveraged AI-assisted tools for code review and pair-programming, accelerating development cycles while preserving code quality and consistency.

MONOGRID // front-end developer

FEBRUARY 2022 - JANUARY 2026 | Firenze, Italy

Active contribution to web development projects for both customer-facing and back-office interfaces. Collaborating in teams to develop innovative solutions for delivering tailor-made web experiences for high-profile international clients. Integrated AI-assisted workflows into the development process for code review and rapid prototyping, boosting delivery speed without compromising code quality.

Cloud4Wi // front-end developer

JULY 2019 - FEBRUARY 2022 | Pisa, Italy

Contributed to the development of the company's platform, with direct ownership of maintaining and updating customer-facing interfaces and services. Worked on UI design and maintained data pipelines for data visualization, delivering useful insights to customers.

GeoMind // front-end developer [intern]

SEPTEMBER 2018 - JULY 2019 | Pisa/Lucca, Italy

Development of a web application for the Tuscany regional project TurfUp ("Remote monitoring and management of turfgrass"), including training in C++ for building Android application libraries.

Cloud4Wi // front-end developer [intern]

MARCH 2018 - MAY 2018 | Pisa, Italy

Developed a graphical library based on d3.js and integrated it into the company's product.

// ACADEMIC EDUCATION

Master's Degree in Digital Humanities

Università di Pisa - OCTOBER 2016 - OCTOBER 2019 | 110/110 *with honors*

Thesis: ScrollAStory.js: A Library for Creating Scrollytelling Web Pages – development of a class-based JavaScript library for creating scrollytelling products and implementation of a web-based editor.

Bachelor's Degree in Digital Humanities

Università di Pisa - SEPTEMBER 2013 - OCTOBER 2016 | 110/110

Thesis: The Epigraphs of La Spezia and WPDB_Interface: Cataloging the Epigraphs of the La Spezia Area – development of a WordPress plugin for cataloging epigraphs.
